

GAM30031 - Games Programming

Marker Evidence Sheet - Sustainable Affairs

Marking Area	Evidence In-Game	Video Timestamp	Where Marker can Test
Challenge Brief	Raising awareness for the complexities of urban planning and resource management - Rising difficulty between each level, where third level is impossible to meet all criteria.	2:20	All levels
Core Gameplay and Progression	- Gameplay loop revolves around building and demolishing buildings. - Objective is to reach thresholds for various stats. - Success is reached when all required stats are above their threshold.	3:08	All levels
Physics and Interactions	- Normal land - Makes no changes. - Water - Slows player movement. - Roads - Speed up player movement. - Broken Roads - Creates slippery effect.	3:51	- Normal - All levels - Water - All levels (Edges of the map) - Roads - Levels 2-3 - Broken Roads - Level 3
Modular Programming	- Stats manager - Can be independently accessed by any other script. - UI - As long as a game manager is in the scene, the UI will pull all the required stats - Plot object - Can be placed anywhere and will automatically work. - Debris spawner - Can be independently triggered by any other script.	4:43	All levels
Animation and Feedback	<u>Animations:</u> - Player sprite pointing in the direction of movement. <u>UI feedback:</u> - UI updates when buildings are placed - Debris explosion when buildings are demolished <u>Success/Failure Feedback:</u> - Confetti upon completion of a level	5:38	All levels
